

This note describes the new features, fixed bugs and known problems that are specific to versions of *Password Safe* for Mac and Linux. For the Windows version, and all common changes, please see [ReleaseNotes.pdf](#).

For a short description of Password Safe, please see the accompanying [README.pdf](#) file. For more information on the product and the project, please visit <http://pwsafe.o>. Details about changes to older releases may be found in the file [ChangeLog.pdf](#).

In the following, SFxxxx refers to Bug Reports, Feature Requests and Service Requests in PasswordSafe SourceForge Project tickets, and GHxxxx refers to issues in the PasswordSafe GitHub project.

PasswordSafe 1.24.0 Release 8 May 2026

New features in 1.24.0

- Custom fields can now be added to each entry. That is, fields with user-defined names and values.

Bugs fixed in 1.24.0

- [GH1751](#) Changing the height of the AEdit dialog will cause a vertical scrollbar to be added.
- [GH1685](#) Attachments are now copied over by Drag & Drop between V3 safes.
- [GH1646](#) In the "Flattened List" view, sorting by time columns (e.g., entry creation time) now works correctly.
- [GH1661](#) MacOS specific: The app no longer crashes when changing a filter criteria for Attachment - Media Type.

PasswordSafe 1.23.0 Release 22 November 2025

New features in 1.23.0

- Password Safe now supports adding a single attachment to an entry. Previously this was only available in the experimental V4 database format. With this release, the ability to add, update, remove and download a single attachment to an entry is now available via a new "attachment" tab in the AEdit Entry window.

Bugs fixed in 1.23.0

- [GH1293](#) If a group becomes empty after moving an entry, it's no longer automatically deleted.
- [GH1433](#) Group subtrees no longer collapse when adding an entry.
- [GH1443](#) The destination directory of an Export Report can now be specified by the user.
- [GH1543](#) Tweak Find functionality: selection and translation fixes.
- [GH1584](#) Entry names are no longer truncated in error message.
- [GH1619](#) A Debian package for release 13 (Trixie) will be part of the release.
- [GH1626](#) Search result is no longer hidden by horizontal scrollbar.

PasswordSafe 1.22.0 Release 11 July 2025

Bugs fixed in 1.22.0

- [GH1227](#), [GH1228](#) Irrelevant functions are now disabled when databased is locked.
- [GH1472](#) 'Go' button in AEdit window now respects "alt" browser specification.

New features in 1.22.0

- macOS: File type associations are now supported for .psafe3 and .ibak files. The Pwsafe icon will be used in Finder and the app can be launched by double-clicking a file.
- [GH1237](#), [SF823](#) A rough password strength meter now displays the strength of the password for entries and the master password.

PasswordSafe 1.21.0 Release 28 March 2025

- In this release, PasswordSafe will significantly increase the standard (default) unlock difficulty of PasswordSafe databases. This may cause a noticeable slowdown when reading and writing databases. This is necessary to maintain the same level of security on today's hardware as when PasswordSafe was originally released.
- Authenticator codes (One-time passwords, OTP, TOTP) can be configured and used via the UI.

Bugs fixed in 1.21.0

- [GH1317](#) Aliases can now be created from new or edited entries.
- [GH1408](#) Time fields (such as password modification time) are now copied over correctly in sync operations between databases.
